Outline Drawing

Recommended Land Pattern & Frequency Tuning Scenario Circuit

All dimensions are in millimeters (mm) unless otherwise noted. Drawings are not to scale.

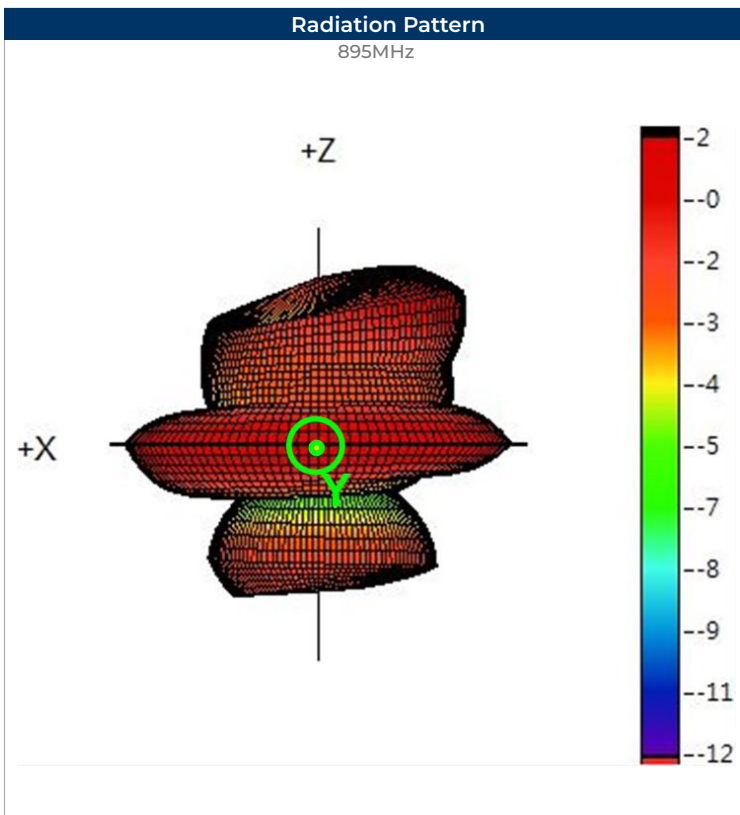

For these suggested values for the matching and tuning of components, the average frequency will be 824-960MHz & 1710-2170MHz on a standard 110 x 49mm² Evaluation board.

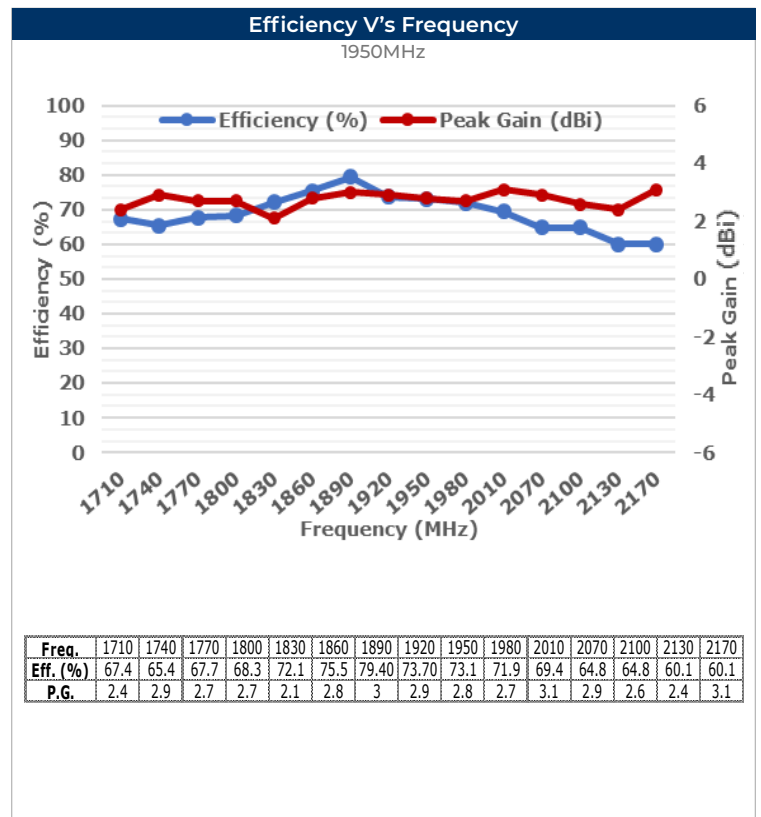

Please note, these are average reference values which may need to be changed when different circuit boards or manufactures are used.
